
PSYCHOTRIA BERRYI,
A NEW NAME FOR
P. DAVIDSAE

Steyermark named *Psychotria* “*davidsae*” after his co-collector (Davidse, male) of the type specimen, not noticing that the *International Code of Botanical Nomenclature*, Art. 73.10, stipulates that the epithet must be corrected to *dauidsei*, which makes the name an illegitimate homonym. As all three collectors of the type specimen already have *Psychotria* species named after them, I rename the species as follows, after the first-named co-collector of a paratype.

Psychotria berryi Wingfield, nom. nov. based on *P. davidsei* Steyerm. (as “*davidsae*”), Ann. Missouri Bot. Gard. 71: 1177. 1985, non *P. davidsei* Dwyer, Ann. Missouri Bot. Gard. 67: 368. 1980.

—Robert Wingfield, *Apartado 7357, Coro, Falcón, Venezuela; herbario “Coro,” Dpto. de Investigación, Instituto Universitario de Tecnología “Alonso Gamero.”*
